

## About Us

As a female surgeon, Dr. Barbarino recognizes the need to see patients with a woman's perspective. Accordingly, she addresses specific concerns with a woman's perspective -jowls, turkey necks, excess skin, droopy eyelids etc. She empathizes with her patients' desire to look refreshed, well rested, and to look like the best version of themselves. Dr. Barbarino and her team help her patients of all genders achieve their own personal goals that cannot be accomplished through hard work at the gym or through a good, healthy lifestyle alone.
